CONSTRUCTION OF LACIB-DOTIK IRRIGATION SCHEME, MANUFAHI MUNICIPALITY

TENDER-ICB/081/MAPPF-2026

CLARIFICATION NO. 3

30 July 2026

Reference	Questions	Response
Sec.8: PCC, Part A - Contract Data, ssc 1.1.84	Please clarify whether the correct time for completion period is 24 months or 1080 days.	The correct completion period is 24 months.
Section 3: Evaluation and Qualification Criteria - Personnel	Based on the personnel requirements, could you please confirm whether a Bachelor's Degree in Civil Engineering, together with a Construction Quality Management Certificate, would be considered an equivalent qualification to a Degree in Quality Assurance and Management for the position of Quality Assurance Representative?	Yes. A Bachelor's Degree in Civil Engineering with a relevant Construction Quality Management Certificate may be accepted, provided the bidder meets all other personnel requirements.
Section 3: Evaluation and Qualification Criteria - Equipment	Could you please confirm whether the equipment requirements specify the minimum required capacity?	Yes. Where capacity is stated, it shall be considered the minimum requirement. Where not stated, the equipment proposed must be suitable for the works.
Section 3: Evaluation and Qualification Criteria - Equipment	Is the equipment used in an aggregate production plant the same as that used at an aggregate supply source, such as a stone crusher?	A stone crusher may be part of an aggregate production/supply system. The bidder shall provide suitable equipment to meet the required aggregate production and quality.
Section 3: Evaluation and Qualification Criteria - Equipment	For a water truck with a pump, is the pump separate from the water truck, or is it integrated with the water truck?	Either integrated or separate pump arrangement is acceptable, provided it performs the required water truck function.
Technical Specification	Has the project site been cleared?	The project site has not been confirmed as fully cleared. Site clearing is included in the works and shall be carried out by the Contractor as required.

Reference	Questions	Response
Technical Specification	Is an access road to the project site available?	Access/Inspection Road is included in the project scope. The existing access condition shall be verified by the Bidder during the site visit.
Technical Specification	What is the maximum allowable vehicle load on the access road leading to the project site?	The maximum allowable vehicle load is not specified in the provided documents. The Bidder shall verify the road condition and comply with applicable local regulations.
Technical Specification	Is it permissible to use material from common excavation as embankment fill?	Yes, subject to suitability. Common excavation material may be used as embankment fill only if it meets the required specifications and is approved by the Engineer.
Technical Specification	Is a disposal area provided for excavated material, and what is the hauling distance?	A specific disposal area is not designated by name. The EE assumes a disposal hauling distance of approximately 1.5 km; the final location shall be verified/proposed by the Contractor and approved by the Engineer.
Bill of Quantities Summary	In the Bill of Quantities Summary, there is an item entitled "CONTINGENCIES (5% × A)". Could you please clarify whether this amount is considered a non-competitive (provisional) item? Is it mandatory for all bidders to include this amount in their bid at the specified value?	Yes. The Contingencies item shall be treated as a provisional/non-competitive item and must be included by all bidders as stated in the BOQ Summary.
Bill of Quantities Summary	In the Bill of Quantities, the ancillary buildings are to be equipped with a solar power supply system. However, we could not find the relevant design parameters or technical specifications. Could you please provide the corresponding design criteria and technical requirements to facilitate an accurate quotation?	The solar power supply shall be provided as a complete set for the building facilities. The EE indicates Solar Cell 300 WP polycrystalline or equivalent, including complete installation and accessories.

CLARIFICATION NO. 2

20 July 2026

Reference	Questions	Response
Section 3 (Evaluation and Qualification Criteria)	How the NEB is applicable.	To be considered for the National Eligibility Benefit (NEB), Bidders shall submit duly completed Forms NEB-1 and NEB-2 as part of the Price Bid. The eligibility requirements stated in these forms are mandatory for obtaining the applicable NEB percentage. Following completion of the technical and financial evaluation, the applicable NEB shall be applied to the Overall Combined Score using the following formula: Adjusted Overall Combined Score = Overall Combined Score $\times$ (1 + NEB Percentage $\div$ 100) The Bidder's ranking shall be determined based on the Adjusted Overall Combined Score. A Bidder that does not meet the NEB eligibility requirements shall receive an NEB percentage of 0%.
